Our Features

WorkForce Management

Attendance Management

Fees Management

Timetable Management

Communication Management

Report Cards

Admission Management

About Us

Established in 2019, CrayonBox was built to address a long-standing gap in school management, over-reliance on manual processes. Our founder, Mr. J. Sharath Kumar, envisioned a system that could reduce operational effort while improving overall efficiency. CrayonBox brings essential functions into one place, helping schools manage tasks efficiently while reducing dependency on paperwork and repetitive work.

Today, we empower schools with a smart, scalable, and user-friendly platform that improves efficiency, reduces manual effort, and enables better decision-making. As schools grow, our solution grows with them, ensuring long-term reliability and performance.

Value We Bring

At our core, crayon box is guided by strong values: uncompromised security to protect sensitive data, pioneering innovation to stay ahead of evolving needs, scalability to support institutions of all sizes, and integrity in everything we build and deliver.
